FELL 800 YARDS IN PARACHUTE

French Aviator Tried Experiment from a Moving Airplane

UMBRELLA WAS 12 YARDS IN DIAMETER

Captain Sarret Landed Safely in a Dangerous Experiment

With the American Army in France. Tuesday, July 30.—(By the Associated Press).—Captain Sarret, a French aviator, has carried out the first experiment on record of falling from a moving airplane with a parachute. He dropped 800 yards with an umbrella twelve yards in diameter and landed safely.

He occupied and fell from the observer's position, but similar experiments for the pilot will be undertaken soon.

Although Captain Sarret's trial was made at a height of 800 yards, it is declared there is no obstacle to jumping a greater distance since the parachute has an even chance to open. When successful the employment of parachutes will save the lives of many aviators.

Airmen will be able to leave their flaming machines and will not meet death as did Major Raoul Lufbery on May 19.

Captain Sarret was in the air about three minutes after he had cut loose from the airplane. He was completely composed upon landing and wrote a message describing his sensation during his descent.

COUNTRY OF UNLOCKED DOORS.

That Ought to Be the Title of Italy, It Is Said.

Headquarters Italian Army, July 31.—"Italy ought to be called the country of unlocked doors," said F. C. Thwaites of Milwaukee, who is in charge of the American Red Cross work on a large section of the front.

"I think honesty is the chief trait of the Italians," he said. "The best proof of this general statement is that I never lock my hotel door anywhere in Italy, nor do any other Americans after they have been here a few weeks. We go away from our hotels, perhaps for days at a time, leaving our doors unlocked and all our personal belongings at the mercy of the first comer, and yet we never dream of losing anything, either through theft or servants or trippers."

"Out on the front you can leave your automobile standing anywhere you like, with your overcoats or any other belongings, and be sure that nothing will be disturbed. At that there may be plenty of poor fellows about who would most gratefully accept any small present."

U. S. STEEL PAYS USUAL DIVIDEND

Earnings for the Last Quarter Show an Increase of \$5,000,000 Over the Previous Quarter.

New York, July 31.—The U. S. Steel corporation yesterday declared its usual quarterly dividend of 1 1/2 per cent and usual extra dividend of three per cent on the common stock, together with the regular 1 1/2 per cent on the preferred.

Total earnings of the United States Steel corporation for the quarter ended June 30 last were \$62,557,391, compared with \$56,961,424 at the close of the previous quarter, according to the quarterly report.

The figures were reached after appropriating for income and war excess profit taxes, the sum of \$90,716,250.

IGNORED THE POLICE

When Latter Ordered Spectators at Cock Fight to Disperse.

Dublin, July 31.—The police are not getting much help from the magistrates in their campaign to put down cock fighting in Ireland. At Lurgan, when Joshua Leatham, described as the "second" for the Ulster birds in a great match at Kildare, was prosecuted for cruelty to the birds his case was discharged on payment of costs. There were 800 or 900 spectators at the cock fight. The police warned the parties to disperse but as there were only 32 policemen present they were not sufficient to stop the proceedings.

TO ELECT "ALECONNER"

For the First Time in Half a Century in London.

London, July 31.—For the first time in 50 years an election is shortly to be held in the London Guildhall for the post of "city aleconner." The position carries a good salary but apparently no particular duties. The "aleconner" was originally an officer who inspected and tested any new brands of ale.

GERMAN POTASH INCREASES.

Output for 1918 Is Estimated at Over Million Tons.

Amsterdam, July 31.—The German potash output for 1918 is estimated at 1,050,000 tons, of which 918,000 tons are destined for home consumption and 137,000 tons for export to neutrals. Last year the total output was 791,000 tons.

WECOB WALLBOARD

CHEAPER EVEN THAN CHEAP BOARDS BETTER THAN LATH AND PLASTER

Use it instead of lath and plaster or sheathing—use it wherever you want to put up a partition, a wall or ceiling in any of your buildings. It is cheap—goes on quickly and with less labor. Anyone can nail it in place in a few minutes. No joints, no cracks. Comes in handy sheets and does not crack or crumble like plaster. Cool in summer—warm in winter—never fades.

WECOB WALLBOARD

Makes Beautiful Rooms

Use it for remodeling or when building a home and save at least one-third the cost of plastering. Use it for turning waste space into useful rooms—for making closets, bathrooms, pantries, etc. You can use it in garages, barns, stables, laundries, cellars, dairies, poultry-houses, etc. The best general utility material you can have about the place and you will find it useful every day. Why not keep a bundle or so on hand?

HOGS STRONG AT BRIGHTON.

These, However, the Only Thing on the Livestock List to Show Strength.

Brighton, Mass., July 31.—Hogs were the only thing on the livestock list that showed strength at the Brighton stock yards yesterday morning. Light receipts prevented a further decline in values of beef stock. Buying was slow, owing to dull markets for dressed meats and excessive heat.

No fancy beef cattle were seen in the yards yesterday. Top offerings were not quotable at over 10@11c. Good cattle were at 8@9c and light cattle at 6@7c. Best beef cows were selling around 10@11c for fancy, with average tops at 8@9c, cows at 6@7c, ordinary cows at 5 1/2@6c, and canner cows at 3@3 1/2c. Otis Forbush had a fine Ayshire bull that was held at 11c, but bidding was slow. Fancy stock was selling at 10@11c, average bulls at 7@8c, and bologna bulls at 3 1/2@4c.

Calves held their own very well, owing to light receipts, and sales were made on about the same level as that of a week ago. Fancy small lots brought around 15 1/2@16c, bunch lots 14 1/2@15c, fair lots at 12@13c, small calves 10@11c and grassers and drinkers 8@9c.

A few sheep and lambs were among the arrivals yesterday, the first noted for months in quantity sufficient to make a quotation. Sales were made at 10c for sheep and 17c for lambs.

No further change was made in the prices of live hogs, though lower prices were predicted. Best lots sold at 18@19c and rough lots at 17 1/2@18c. Dressed hogs are unchanged in price, the local packers still quoting 23 1/2@24c.

The local kill of hogs is holding well to recent figures. The total for the past week, reported by Boston packers, is 23,000 hogs, compared with 24,000 for the preceding week and 16,000 for the same time last year. The total since Jan. 1, 1918, is 853,000 hogs, against 774,000 for the same period in 1917.

Milk cows are steady in price, though the demand is light and the supply ample. Prices range from \$50@55, according to quality, pedigree or milk record.

BIG PRICES FOR TOBACCO

Are Assured the Planters of Porto Rico This Year.

San Juan, Porto Rico, July 31.—Tobacco planters who have held their crops to the present time in all probability will get as much for it as the high prices realized last year when prices made a new high record for Porto Rico.

Tobacco buyers during the past ten days have suddenly realized that the crop which originally they expected would be the largest in the history of the island had suddenly shrunk and that instead of being 35,000,000 or 40,000,000 pounds it is not now estimated to exceed 25,000,000.

Prices have been advancing so that a good many buyers now figure that purchases made during the past week have been on basis which make the prices as high if not higher than last year's crop, which averaged in many instances more than 40 cents a pound or more.

JAPANESE PLANT BLOWN UP.

Thirty People Killed and Sixty Others Were Injured.

London, July 30.—Thirty persons were killed and 60 others injured by an explosion of munitions at Shimomae, Japan, on Saturday, says a Central News despatch from Tokyo.

Women Who Fascinate.

The art of fascination and attractiveness in women is founded on good health. Women who drag through long hours, days, weeks and sometimes months of suffering with headaches, backache and dragging-down pains soon wear the telltale expression of woe and misery. If every such woman would only turn to that good old-fashioned root and herb remedy, Lydia E. Pinkham's Vegetable Compound, to alleviate such ailments, it would surely prove the greatest aid to health and consequent beauty that she has ever known.—Adv.
